DRAPERY HARDWARE

HARDWARE FEATURES

- Premium Traverse System Features:
 - Premium single track, center-draw traverse rod systems are available as hand-draw and corded systems with or without c-rings in both 4' and 8' lengths.
 - Heavy-duty aluminum tracks are of the highest quality.
 - Superior strength performance. Maximum fabric weight: 6 pounds per foot.
 - Tracks are powder-coated inside and out in a brown finish, and sealed with a factory-applied dry-lubricant. This patented finishing technique allows for smooth operation and effortless glide of drapery across the rod.
- All hardware is hand-carved.
- Select styles are available in unfinished: Pinecone finial, Scallop finial, Sheraton finial, Rosette tieback, standard bracket, fluted rod (4' and 8'), and rings.
- Due to the variety of wood types used, variation in the wood coloration of the unfinished piece is apparent.
- We recommend painting as opposed to staining, as painting allows for more consistent coverage.
- Hand-finishing creates color variation that is to be expected and appreciated; it is part of the inherent beauty of this collection.
